Hovering Canvas, 2018
Yuan Yuming "Michael" - DIY Drone, urban intervention system
## Senior Project, 2017-2018

Artist Statement

Hovering canvas is the aerial art installation invite users participate into the communication system with a drone and create digital graffiti collaboratively, the process is called public intervention. Users can download the application and draw graffiti underneath the drone.

The inspiration came from online social experiment "r/place". The answer to the question "How can express our opinions in a controlled public space?" is *Hovering Canvas*.

Private Conversation, 2018
Jennifer Zhou - Interactive Installation, *Senior Project 2017-2018*
@ArsElectronica: https://ars.electronica.art/error/en/private-conversation/

Description
Two small computer terminal rooms inside a bamboo structure invite audience members to join in a DIY electronic chat room. Unbeknownst to participants though, the entirety of their conversation is being broadcast via morse code on exterior lights of the structure.
